# First Advantage Integration

Combine software for increased productivity. Our integration with First Advantage will help recruiters decrease time to hire with efficient and thorough background checks, managing risk within the CEIPAL platform.
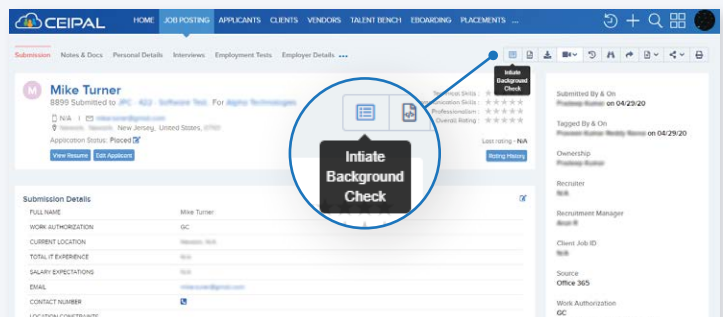

How does it work?

CEIPAL's First Advantage integration allows administrators to configure their First Advantage Client ID to CEIPAL's platform.

Administrators can assign the integration to different teams, streamlining workflow from the top down.

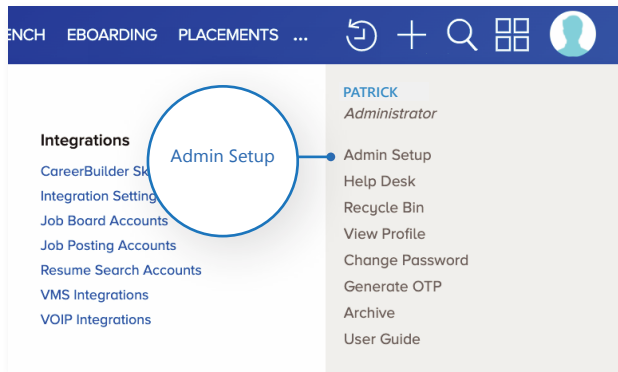

Initiate onboarding directly from candidate's profile, consolidating workflow for increased productivity.
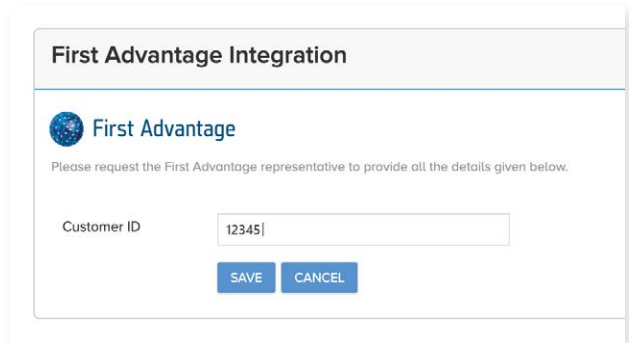

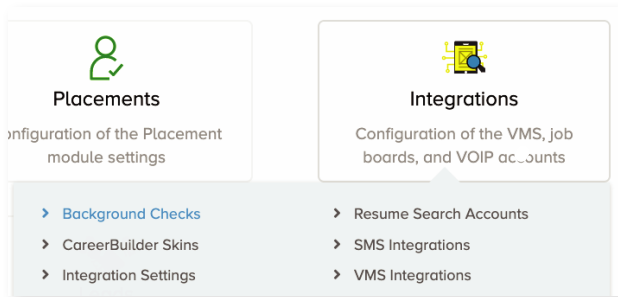

How do I set it up?

1 Access your **Admin Setup** panel

2 Select **Integrations > Background Checks**

3 Select **First Advantage** and enter your customer ID!

4 **Initiate onboarding** directly from your candidate's profile!
