

## A Quick Note from Our Team

Our team worldwide is working remotely to maintain our consistent commitment to providing the best service possible to every one of our clients. This month, we're proud to release a series of product features and updates, most notably AI-Driven Passive Candidate Sourcing, the newest development in our mission to leverage AI technology to enhance productivity.

## New Feature Hotspot

### AI-Driven Passive Candidate Sourcing

Combining the power of AI and big data, this feature automates passive candidate sourcing while offering in-depth profiling and candidate analysis.

- Curate candidate data from public forums like Google, Github, and AngelList, and verify it against candidate LinkedIn profiles, for accurate results.
- Receive hundreds of qualified profiles delivered straight to your dashboard
- Scan candidates' strengths, technical skills, and cultural compatibility
- Benefit from big data analytics with easy-to-understand reports to attract talent

# Product Updates

CEIPAL - Human Capital Management Solution

## Streamlined eBoarding Portal

Complete your entire onboarding process from one page. With our updated eBoarding portal, recruiters can onboard candidates from one centralized location, without ever clicking 'refresh.'

## Email Inbox Sync

Organize your inbox using information from your database. CEIPAL's Email Inbox Sync bridges the gap between communication and data by tracking all emails within the CEIPAL platform, giving recruiters a business-oriented view of their inbox.

Hi Cathy,  
Thank you so much for the details. This is perfect and our team can handle the rest. Whenever you are ready, we will test this one out and confirm. Appreciate all your efforts!  
Thanks,  
Patrick
