CEIPAL Business Units

Organize Multiple Business Units within One Enterprise Account

CEIPAL's Business Units help you organize & access data across business units. With CEIPAL's Business Units, you can organize the job postings, clients, vendors & CRM modules into individual business units. The applicants & talent bench modules remains open at an enterprise level, so your teams have complete access to all available talent across business units.

Easily Manage & Access Insights Across Multiple Businesses

Maybe you own multiple staffing companies. Or, you oversee multiple businesses within one enterprise. CEIPAL's Business Units help you manage these separate organizations & teams from one location. You can assign team members to multiple business units, and these team members can view, manage, and create business reports at an enterprise level.

CEIPAL Business Units Benefits

+ Assign teams to specific business units

+ Customize configurations & manage communications per unit

+ Assign targets to each business unit

+ Generate reports per business unit or at enterprise level

+ Track progress & ROI per business unit

+ Filter job requirements, clients, and vendors by unit

+ Configure workflows for each business unit
